

Watchbill sample packet

Six records from one real watch under the owner, 17 September 2026, redacted. A seventh record type is named and marked absent. Nothing is substituted. The digests below are of the files in this packet.

This PDF is the cover. The evidence is the files listed on page 4. Verify those hashes.

A real watch, redacted · 17 September 2026
Executor seat WBX27, paired with orchestrator seat WBO27
Named human on this watch: the owner
Order placed 00:22:15 ET · closed 17 September 2026
The watch officer on this watch was the owner.

Record 01 · Authorization record

Seat opened on 17 September 2026 by the owner.
The order in force was placed by the owner at 00:22:15 ET.
Authority: read and propose. Nothing was installed outside a test copy, and nothing left the machine.
Closed on 17 September 2026.

[redacted: registry name, working-surface names]

Record 02 · Human approval record

Every irreversible act in this watch was the owner's: three filings, the placement of the order, one disposal, two scripted runs, and the executor relaunched.
00:22:15 ET · The order was placed by the owner.
The placement script was read in full and run by the owner; it exited cleanly.
A second script was run by the owner with a cleared environment: 8 of 8 checks passed.
Three rulings were filed by the owner's hand: WB 138, WB 139 and WB 140.

[redacted: script names, paths]

Record 03 · Refused-action record

07:36:02 ET

A scripted delete-and-rebuild of a scratch copy of test files.

Refused before it ran.

A command reserved to the owner.

08:25:34 ET

A read-only command, over-blocked.

Refused before it ran.

Over-block: refused as a reserved operation, though it was read-only.

11:23:46 ET

A read-only command, over-blocked.

Refused before it ran.

Over-block: refused as a reserved operation, though it was read-only.

11:25:12 ET

A read-only command, over-blocked.

Refused before it ran.

Over-block: refused as a reserved operation, though it was read-only.

Three of the four were over-blocks of read-only commands; the record keeps them as refused.

[redacted: paths, commands, file names, reason codes]

Record 04 · Tamper-evident filing record

Filings from this watch, in the append-only ledger:

WB 138 · GOV · filed · 2026-09-17

WB 139 · GOV · filed · 2026-09-17

WB 140 · GOV · filed · 2026-09-17

WB 141 · LOG · filed · 2026-09-17

WB 142 · LOG · filed · 2026-09-17

WB 143 · WO · filed · 2026-09-17

Each row carries a link computed from the row before it. [redacted: link values]

Chain check on 27 September 2026 at 20:38 ET: passed, 864 chained rows after the starting checkpoint.

Record 05 · Scoped work order

Order WB 143, "Watchbill packaging and distribution", cut on 17 September 2026 by orchestrator seat WBO27.

Placed by the owner at 00:22:15 ET, and bound to this session by a stamp for WBX27.

Scope: propose, never install. Writes to one staging area only.

Stop points: every leg ends in an explicit STOP, and the next leg resumes only after the orchestrator seat has checked the last.

[redacted: paths, file names]

Record 06 · Independent re-verification receipt

Every leg was checked by the orchestrator seat by re-measurement on disk, not taken from the executor's report.

One leg was refused on two blocking defects, reworked, and then accepted.

114 baseline entries were re-hashed by the orchestrator seat.

The executor's closing record passed all four closing checks at the orchestrator seat.

[redacted: digests, instruments]

Record 07 · Provenance-labelled report · NOT IN THIS WATCH

Not present in this watch. The slot is listed so the gap is visible. Nothing is substituted.

Scope stamp

One slice, not the whole framework.

Evidence, not a compliance conclusion.

Partials are named.

Access enforcement is partial. The refusals on this page come from a check made before an agent acts. It is not a sandbox, and it does not inspect every path an agent could take. Every access-control mapping that rests on it is marked partial.

Self-produced, not yet attested. No SOC 2 examination. No SOC 2 criterion on this page has been examined by a service auditor.

What this is not

No compliance conclusion, certification or attestation of any kind.

No third-party review of this evidence yet.

Nothing about model behaviour or interpretability.

ISO/IEC 42001 is not mapped on this page.

This page names the evidence Watchbill™ produces and where it sits in frameworks a reviewer already uses. It concludes nothing about compliance with any framework, standard or law, and it does not say that any system is compliant or certified.
